

Add Additional Students to Your Created Account

If you already have an account created from one of the Pilot schools use the following instructions to add additional students to your account.

Login to your account and go to the Account Preferences page.

Change your tab to Students and click on Add. You will get the pop up window below and you will need to enter the information for your student. You can add as many students as you need as long as you have the Access ID and Access Password for each student.
