

**ASSIGNMENT OF PUPILS**

It is the District's intention to provide an appropriate placement for all students.

The District believes that the needs of students are generally best met by attendance at the school designated for their area of residence.

If space is not available in the school of residence, students will be assigned to another school within the district.

The Superintendent or designee may also transfer a student to a school other than the school of residence if circumstances make continued attendance at the school of residence impractical or inadvisable.
