

When did students stop going home for lunch?

Our sack lunch program began with the fy85 school year.

Wouldn't that have been a good time to start thinking of lunchrooms??

Since neither current School Board members, nor current Administrators were involved in that decision process, we cannot determine the intentions of the BOE or administration at that time. However, it is worth noting that enrollment was at an all-time low in the 1980's, so space was most likely, not an issue.

Are the facilities being used after school by other groups (i.e. Berwyn rec)

Yes

If so are they being charged a rental fee???

No, we do not charge for the use of our facilities when students are involved.

When did the 1955 boiler(s) start breaking down???

It was never stated that the 1955 boiler broke down. Routine maintenance and replacement of worn parts are a challenge, as parts are difficult to obtain. The 1955 boiler is also, a single boiler, while other schools have multiple boilers, which is more energy efficient, and safer, in the event of a boiler failure.

Why were they not addressed shortly after???

All boiler repairs are addressed immediately.

Has the budget over the last 5 years reflected the need for a new boiler???

No. Deficit spending has forced us to address educational needs first, while deferring building needs.
