

## *It started out as a little school with a Bell Tower*

---

*In 1866 a new school building (second school building) was built. The school bell hung in the belfry of the second school tower until it was moved to the three room limestone school building built in 1892. The bell was atop the shingled roof of the one-story limestone building and then the two-story building in 1922 until it was removed from the roof in 1974 when major repairs were made to the roof.*

*The bell tower pictured here is a replica bell tower, which was built in 1987, and houses the original bell from the 1866 school.*
