

HEALTH EXAMINATIONS

The principal at each school shall notify parents/guardians of the rights of students and parents/guardians related to health examinations.

A parent/guardian may annually file a written statement with the principal withholding consent to the physical examination of his/her child. The child shall be exempt from any physical examination, but shall be subject to exclusion from attendance when contagious or infectious disease is reasonably suspected.

Vision and Hearing Tests

Students shall have their vision and hearing tested by qualified personnel authorized by the district.

All students shall be tested for visual acuity when they first enroll in elementary school and every three years thereafter until the student completes grade 8.

For male students, color vision shall be tested one time, after the student reaches grade one. Results of the test shall be entered into the student's health record.

Evaluation of a student's vision may be waived at the parent/guardian's request if the parent/guardian presents a certificate from either a medical doctor or an optometrist specifying the results of an examination of the student's vision including visual acuity, and, in male students, color vision.

Visual defects or any other defects found as a result of the vision examination shall be reported to the parent/guardian with a request that remedial action be taken to correct or cure the defect. If made in writing, such reports shall not include a referral to any private practitioner, and the report of a visual defect shall be made on a form prescribed by the Superintendent of Public Instruction.

The student may be referred to a public clinic or diagnostic and treatment center operated by a public hospital or by the state, county or city department of public health.

Each pupil shall be given a hearing screening test in Kindergarten or first grade, and in second, fifth, and eighth grade, and first entry into the California public school system.

Scoliosis Screening

Each female student in grade 7 and each male student in grade 8 shall be screened for scoliosis. This screening shall comply with California Department of Education

standards and shall be performed by qualified personnel as specified in law.

Persons performing the screening shall not solicit, encourage or advise treatment of the student for scoliosis or any other condition discovered in the course of the screening.

The parent/guardian of any student suspected of having scoliosis shall receive a notice which includes an explanation of scoliosis and describes the significance of treatment at an early age. This notice shall also describe the public services available for treatment and include a referral to appropriate community resources.
